

COGNITIVE MACHINES

We simplify the adoption
on AI and Cloud
technologies

Artificial Intelligence, Simplified

Data analytics, Business Intelligence, AI & Cloud

5 years in business

12 member engineering team
Certified Data scientists

40 + clients in UK and EU

80 + products developed

Microsoft partner

Gold competency in Data and AI technologies

Gold
Microsoft
Partner

Advanced Data Analytics

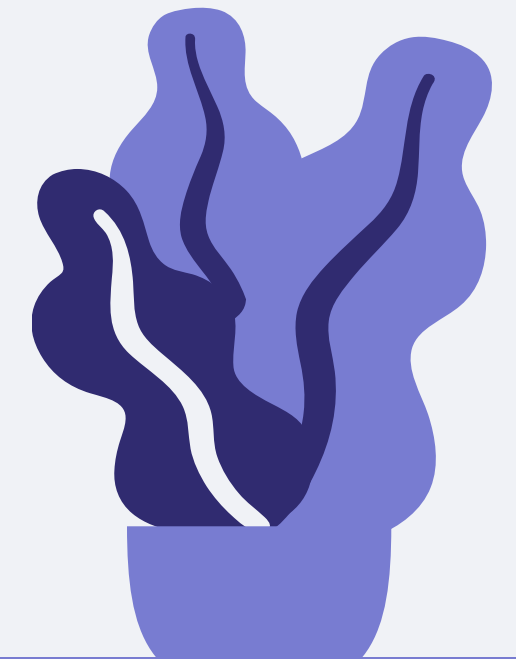

Data Analytics, Computer Vision, NLP, Machine Learning and BI

Cognitive Software

ASR, TTS, Language Tools, Text analytics

Digital Transformation

Cloud, Mobile, AR/VR, Robotic Process Automation

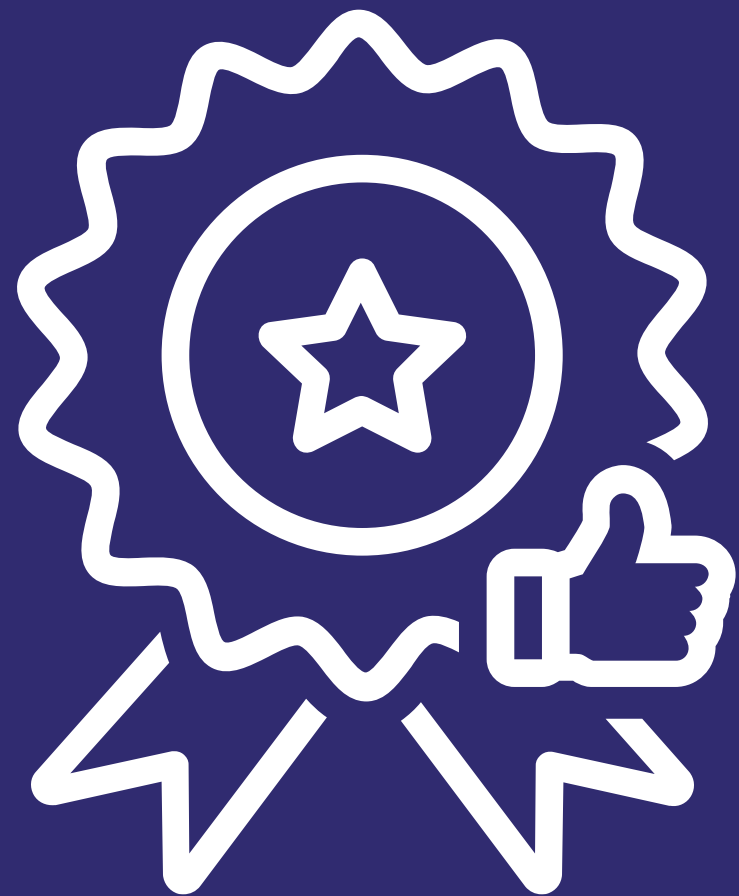

Service areas

We help small and medium businesses to leverage the capabilities of AI. We build custom AI software that brings about a positive change in their business operations.

A trusted partner in AI and Cloud Tech

Reduce the time to market and development costs

The team is extremely knowledgeable, clarifies requirements, effectively manages development & releases, and is very easy to communicate with.

POPPY BEER, THRIFT PLUS

Cognitive Machines delivered a top quality work on this project development. We really enjoyed working with them. They are extremely competent and go the extra mile.

FELIPE LELLI, DUELLI INTERNAZIONALE

I am really happy to have found Bala and his team. They have helped me launch my application, developing it from MVP to full product while solving many technical challenges along the way.

MARIUS HJELSET KING, FLOORD AI

Our Journey

2016

Started business as a Computer Vision software service provider for Machine Vision and Surveillance use cases

2019

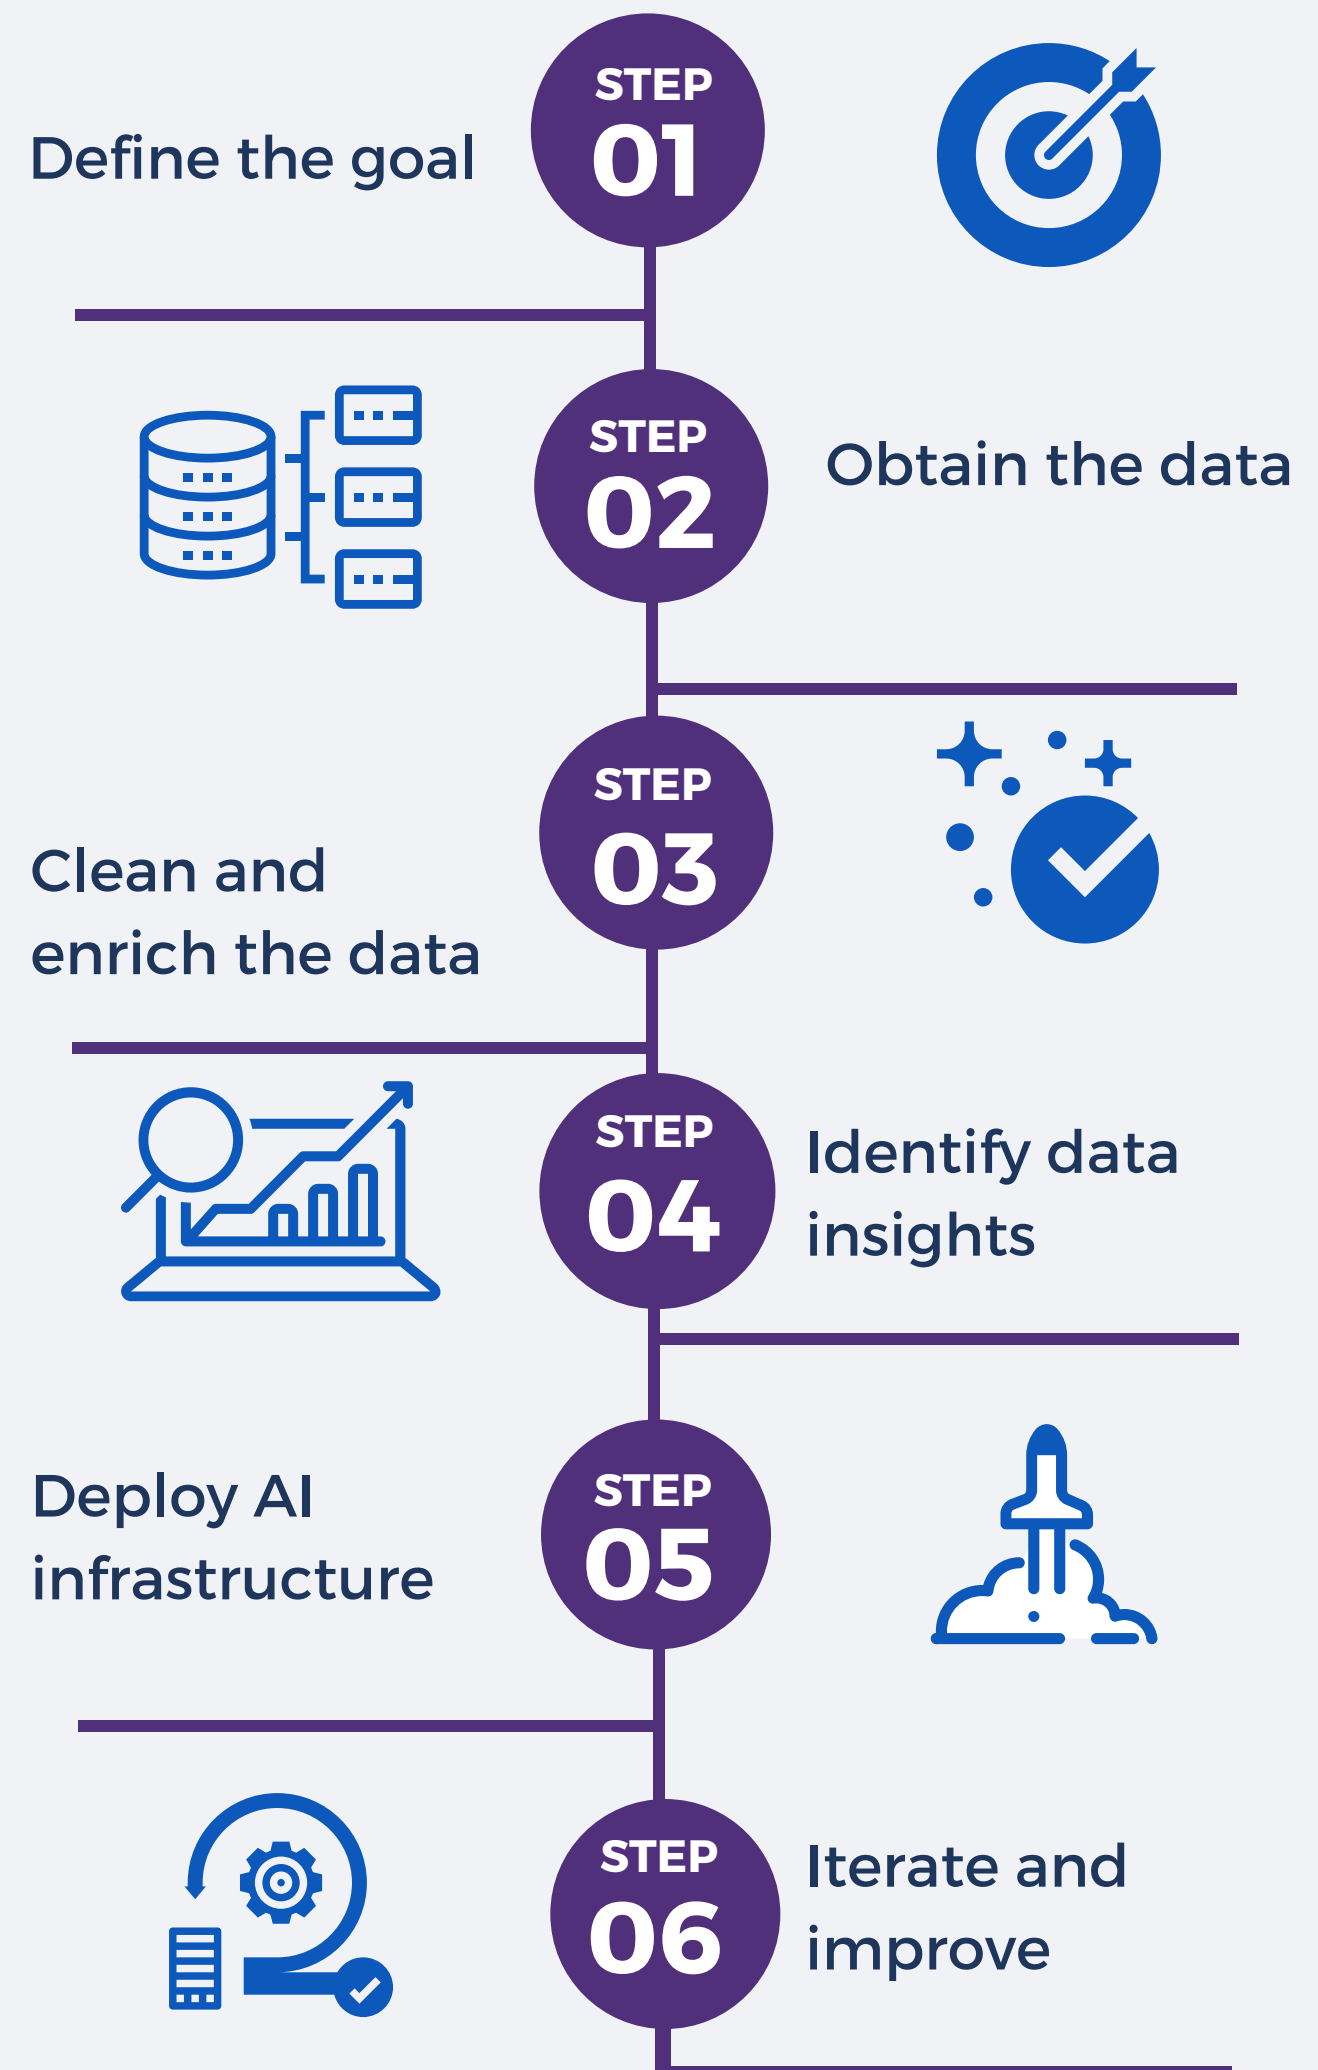

Expanded Computer Vision offerings across multiple industries including Inspection & Maintenance, Retail, Logistics etc

2020

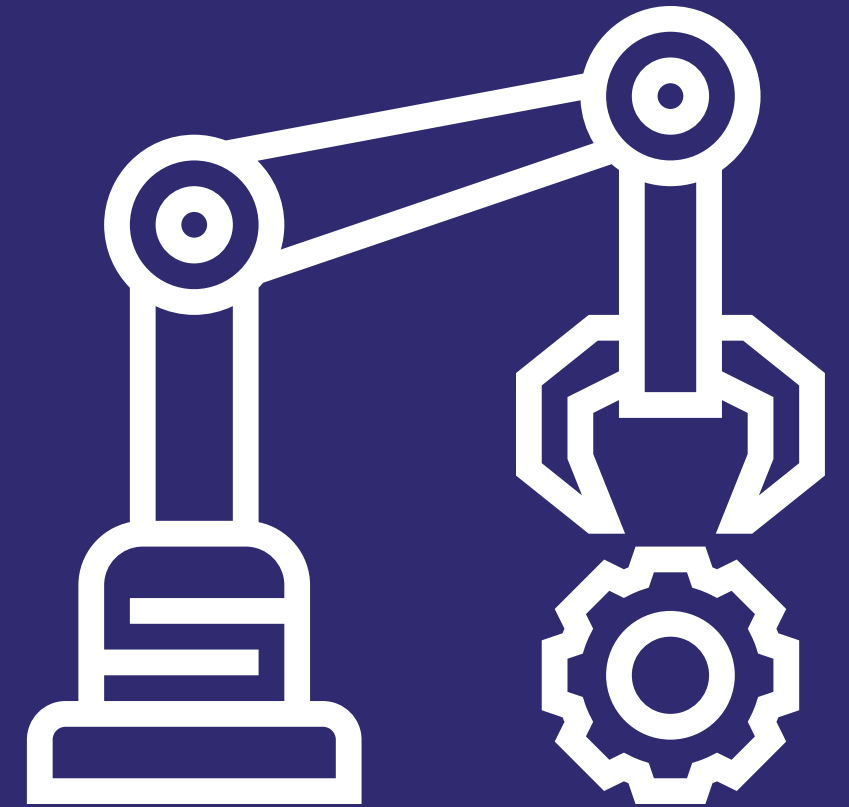

Became a Microsoft Gold partner in Data and AI competency
Expanded technology offerings on NLP, Data Analytics and BI

AI and Digital Transformation process

How do we solve your problem ?

Manufacturing Use Cases

Inspection & quality control

Industrial automation

Predictive maintenance

Grading & sorting

Healthcare Use Cases

Transcription automation

Medical imaging

Advanced data analytics

Mining medical data

Retail Use Cases

Advanced retail data analytics

Customer interactivity, AR and VR

Smart inventory management

Customer personalisation

The Team

Balasaravanan Venugopal

Software Architect

- 20 years in Software products industry
- Ex-employee in Fortune 500 organisations - Rockwell Automation, Harman, Knowles Inc
- Microsoft certified Data Scientist

Dr Gayathri Venkataraman

Product manager

- 10 years in Software products industry
- PhD in Computer Science, NTU Singapore (2004)
- Microsoft certified Data Scientist
