

COGNITIVE MACHINES

We bring your custom software
development goals to reality with
our proprietary agile development
process

Custom software development, Simplified

Mobile, Web and Cloud applications

5 years in business

- 20 member expert team
- Hire top 2% talent
- Certified engineers on Google / Azure / AWS
- Senior engineers with > 5 years experience

40+ clients in UK and EU

- 80+ products developed
- 90% client retention
- 100% client satisfaction

Top tier partnerships

- Microsoft Gold partner
- Google partner
- AWS partner

Mobile App Development

Android, iOS, React Native, Flutter & Xamarin

Web App Development

Django, Spring, .Net & Laravel

Emerging Technologies

AI, Machine Learning, AR/VR & RPA

Service areas

Do you want to build high performance apps for your high performance business ?

A trusted partner in custom apps

Reduce the time to market and development costs

The team is extremely knowledgeable, clarifies requirements, effectively manages development & releases, and is very easy to communicate with.

POPPY BEER, THRIFT PLUS

Cognitive Machines delivered a top quality work on this project development. We really enjoyed working with them. They are extremely competent and go the extra mile.

FELIPE LELLI, DUELLI INTERNAZIONALE

I am really happy to have found Bala and his team. They have helped me launch my application, developing it from MVP to full product while solving many technical challenges along the way.

MARIUS HJELSET KING, FLOORD AI

Our software development process

Product ideation and discovery

- Analyse app idea and ensure its strategic maturity
- Iterative discovery to uncover all features

STEP
01

STEP
02

User experience driven design

- User centric app development approach
- Design thinking for high customer engagement

Agile software development

- Custom agile methodology for highly trackable project management & development
- Two week delivery iterations for continual feedback

STEP
03

STEP
04

Deploy software on official platform

- Automated software deployment using proprietary release management tools

STEP
05

Iterate, improve & support

- Monitor software performance and optimise app
- Ongoing support and maintenance of the software

Why should you choose us instead of the competition?

More options gives rise to more confusion. But, we are unique in the following aspects.

With our proprietary software development process, we are able to achieve zero delivery slippages and produce an app with impeccable quality.

You will see the software grow in front of your eyes. We deliver the application in an incremental manner every 2 weeks. The source code, documentation and final product is visible to you from day one.

We are extremely confident of the software architecture that goes in the product. So we are able to extend a one year free maintenance & support of the delivered app.

The Team

Balasaravanan Venugopal

Software Architect

- 20 years in Software products industry
- Ex-employee in Fortune 500 organisations - Rockwell Automation, Harman, Knowles Inc
- Microsoft certified Data Scientist

Dr Gayathri Venkataraman

Product manager

- 10 years in Software products industry
- PhD in Computer Science, NTU Singapore (2004)
- Microsoft certified Data Scientist
